

*Allen Clark to Jim Kodiak, Alaska*

Hey this is Al - I finished the crib. Thanks for your help. **My Daughter really likes it!**

Thought I would update you on the ole spindle saga. I made a fence for my router table and mounted the tenon jig you sent and they came out great. I think I am ready to cut some oak now.

Thanks for all your support, hope you have a great Christmas.

Al

I think I am ready to put the tenons on the end. Is this what they should be looking like? I looked at a tenon in one of your pictures and I don't know if I am going to end up with those nice shoulders like yours. I made a rig to keep the spindles level while I spin them.

I was reading, and you use mortise & tenons whoooooweeee, I can dowel but I don't know about mortise and tenons. I have always wanted to though. No arguing they are stronger.

Hi Al,

...

Besides sending the Spindle Jig and the actual templates for the Crib headboard (top & bottom including youth bed), I attached the Modifications pages and Spindle Tips page to this email. Please save for future reference.
